# KJTumi Online
Visitor Management Software

KJTumi Online is a modern age, enhanced Visitor Management application to deal with Front Office Management needs, intelligently along with Biometric authentication. It is integrated with Finger Print Scanner, Webcam, Signature Pad for capturing the Visitor information . Fortuna in-house Biometric Devices & Access Control Panel, is also integrated for enhanced security. Upon successful registration a Visitor Pass is generated with the required information which is presented on Gate and verified by the Security Team.

Process Flow

Capturing data with Photo/Finger Print along with other details of Visitor

Data is stored in the Server — **Server**

Confirmation SMS / e-mail sent to the concerned person with whom the visitor came to meet

Card taken back from Visitor while going out

Security Check can be done at any location based on the Gatepass or Access Control

Temporary card (Paper Strip) is issued to the visitor
